Manufacturing competencies

FORGE PRODUCTION

It is equipped with lines of cross-wedge pre-forming, lines of heat treatment, presses. Productivity is 900 tn. forgings in a month, more than 50 types of forgings are mastered.

MACHINING

Processing of details is made with the help of modern processing equipment with numeric control (VIKTOR, SAMSUNG, ML). Robotic lines of processing are introduced and keepable of producing identical details on a mass scale.

PRODUCTION OF GENERAL MECHANICAL RUBBER GOODS

Highly productive, the automated moulding plants of REP firm (France) are used.

WORKSHOP OF ASSEMBLY AND COLOURING

The workshop is equipped with the modern painting line with the technology meeting requirements of international standards.

TOOL PRODUCTION

Own tool production provides 80% forge and basic equipment production.

The elements of quality of our product. QMS

QMS of the company is focused on continuous improvement and the prevention of emergence of discrepancies, decrease in variations and losses.

Certificate registration no. 31100438 TS09

The proof of our compliance to high international requirements in the field of automotive industry is provided by certificates of ISO/TS 16949, and also ISO 9001 received as a result of audit by recognized certification authority – DQS Holding GmbH.

ISO/TS 16949	Quality management system
ISO 9001	Quality management system
ISO 14001	Ecological management system of company
ISO 25000	System of professional work safety

Components of our products quality

Laboratory includes the following divisions:

- Chemical laboratory
- Metallographic laboratory
- Laboratory of non-metals
- Measuring laboratory
- Laboratory of spectral analysis

Laboratory competences:

- Entry control
- Interoperation control
- Control of finished products
- Requalification
- Research work

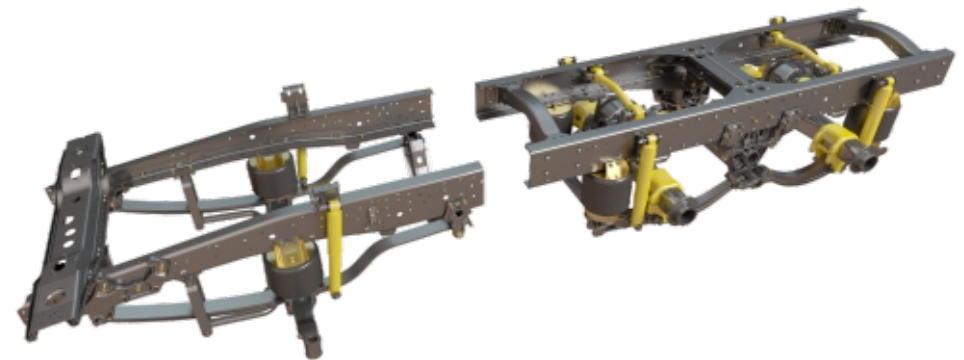

Completed projects

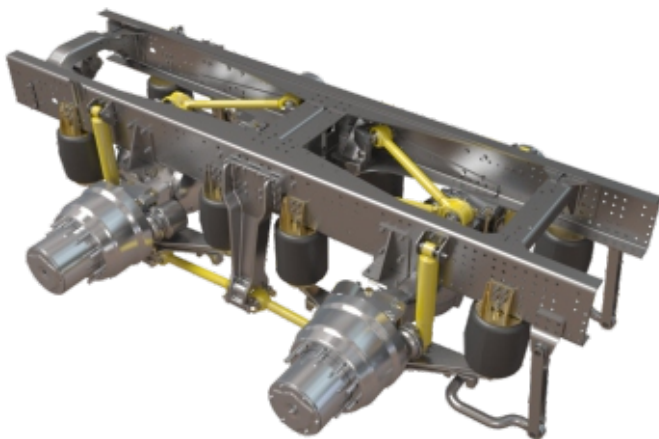

INDEPENDENT SUSPENSION OF BUS CHASSIS

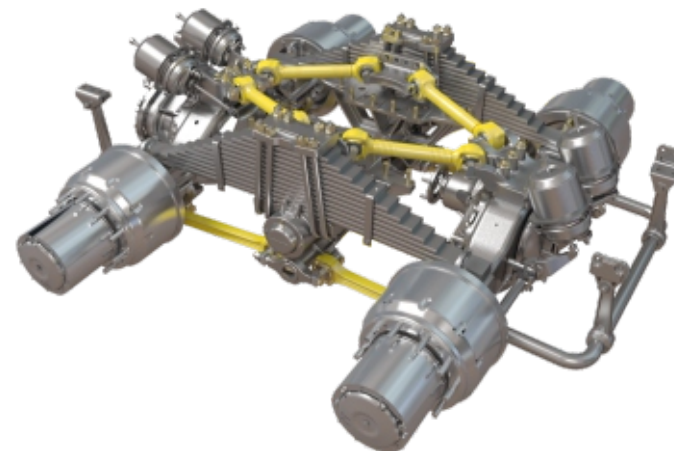

PNEUMOSUSPENSION 65117 "CAMATRANEER" (Front and rear)

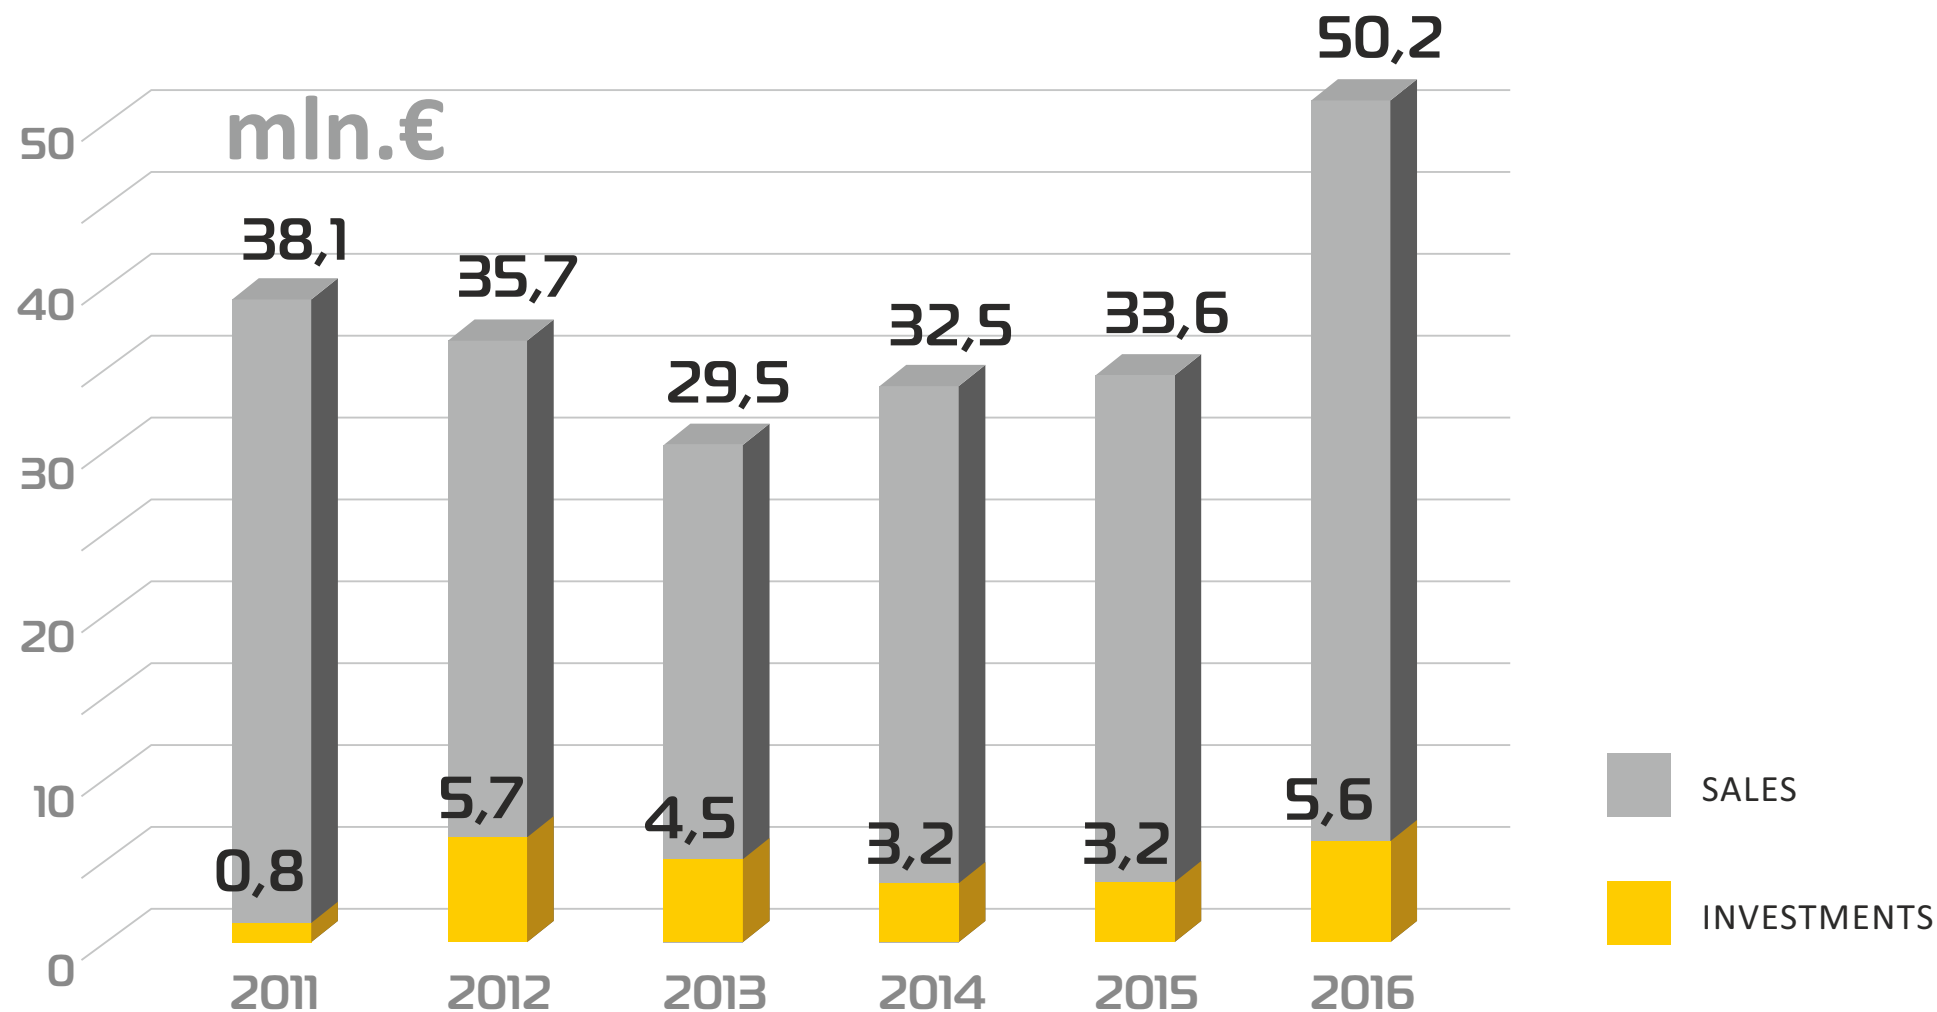

PNEUMOSUSPENSION IVECO TRAKKER 6X6

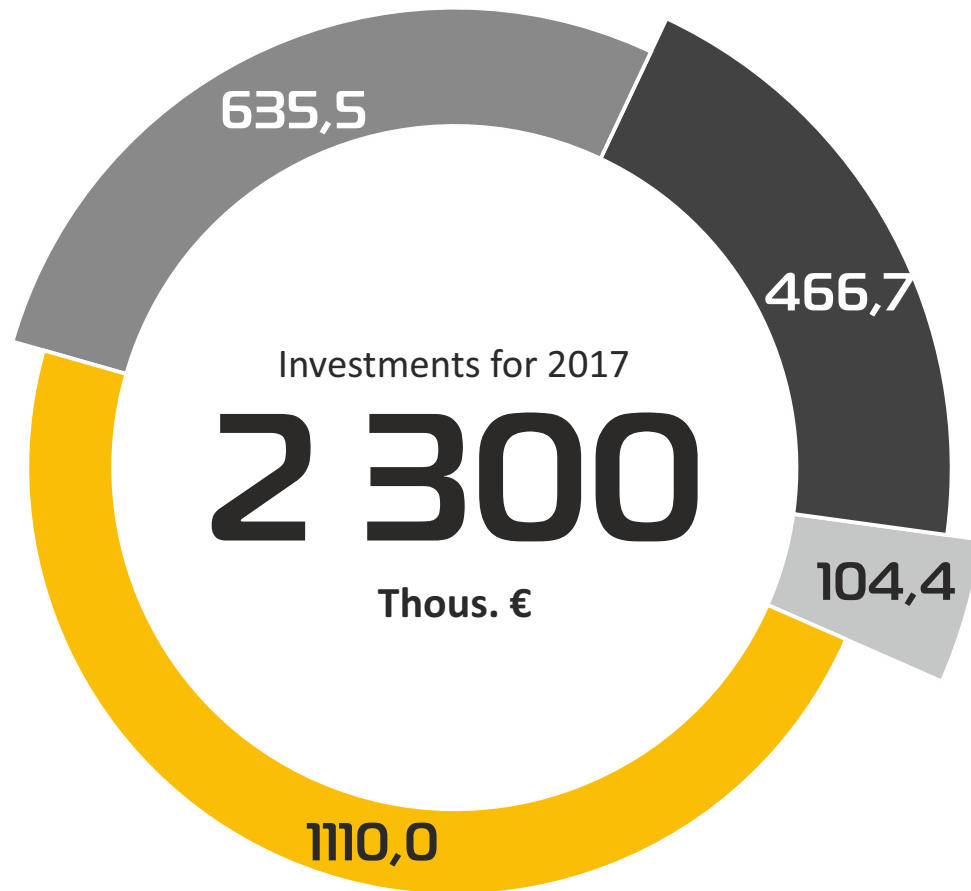

SUSPENSION 6580

Sales from 2011 to 2016

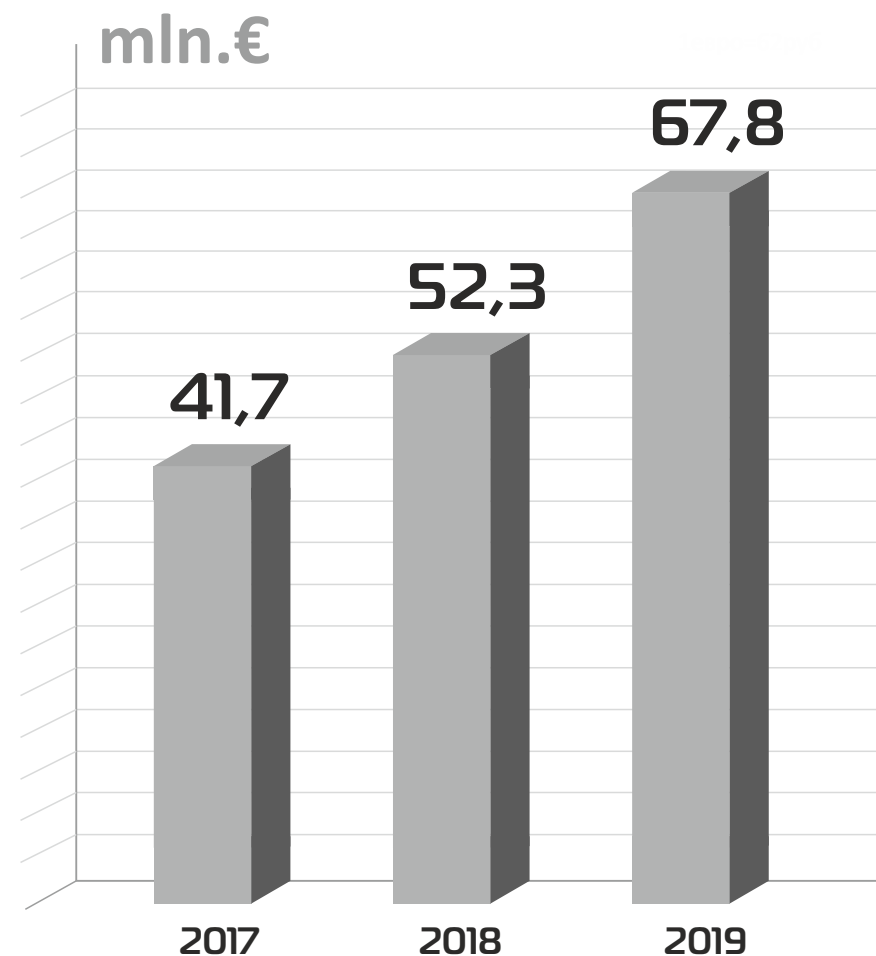

-  DEVELOPMENT OF PRODUCTION ASSETS
-  MASTERING OF NEW PRODUCTS
-  EFFICIENCY AND QUALITY UPGRADING
-  OTHERS

Strategic directions of the company's development

- The increase in the supply of machinery for PJSC "KAMAZ" due to mastering of a new product in terms of the import substitution program, mastering of a new model line in the strategy of PJSC "KAMAZ";
- The product strategy is focused on the development of competencies, the transition to the supply of integrated solutions for the client, expressed in the enlargement of the part. What, in its turn, requires improvement of the R&D direction: upgrading of engineering competences (design, technological), development of a testing laboratory, studying global trends in the automotive industry;
- Entering new markets, segments of autocomponents for trailers, manufacturers of heavy freight vehicles of foreign origin;
- Development of the quality management system to the level of compliance with international standards IATF 16949;
- Work on improving business efficiency by streamlining of core and auxiliary processes.

In the perspective of 3 years it is planned to develop such projects as: Suspension of the cabin, spring suspension, lifting and turning axle, bus suspension.

Total sales amount of Rostar planned for 2017-2019

Our customers

Rostar is the official supplier of leading car assembly enterprises in Russia, as well as manufacturers of buses and trailers

Main customers:

	KAMAZ		Автомобильный завод Урал		IVECO AMT		LIAZ
	MZ «TONAR»		НЕФАЗ		VOLGOBAS		Невские машины

New customers:

	BPW-OST		ISUZU RUS		GC LUIDOR группа компаний		Павловский автобус
--	---------	--	-----------	--	------------------------------	--	--------------------

Potential customers:

	VOLVO		SIMENS		GENERAL ELECTRIC		HYUNDAI
--	-------	--	--------	--	------------------	--	---------
